

British Tenpin Bowling Association

High Score Recognition

April 2016

Written by Lisa John & Emma Ashton

Cloth Badges

Cloth badges will only be available to YBC's and with immediate effect be held, and distributed, by the NAYBC. YBC's are the main applicants for these awards and are the only bowlers that really use the facility the way it was meant when it was created. The Junior Bowlers love to have badges on their shirts to mirror the scouts/brownies etc, and compare badges with their friends at YBC.

All stock held at BTBA head office has been sent to the NAYBC and these are now held centrally with their current stock of badges.

All YBC's will be contacted via the NAYBC to confirm the correct procedure for applying for badges.

Certificates

High Score Recognition Certificates will be available to all BTBA members and these will need to be applied for in the usual way. Application forms are available via the Downloads tab on the BTBA website.

High Game Certificates will be awarded for scores above 275.

High Series Certificates will be awarded for scores above 700.

New Application Forms

New application forms have been re-designed in the same format as the other application forms and are easy to understand and complete. These only apply to Certificates.

Each application form will need to be completed by the applicant, countersigned by their opponent, verified by the league secretary/tournament manager, and accompanied by a print out of the score/scores in question.

Head Office do not need to be notified by telephone/email prior to an application form being submitted.

The form can be scanned and emailed to Head Office as well as posted, but in every case it must contain live signatures. A copy should also be emailed to the Area Secretary for their records.

Each certificate will be sent to the designated person on the application form.

Questions

Please direct any questions regarding this document to Lisa John, Director of Membership Services, in the first instance at lisajohn@btba.org.uk
